Youth-20 Consultation

*Peacebuilding and Reconciliation - Ushering in an era of no war:
The philosophy of Vasudhaiva Kutumbakam*

Dear Sir / Madam,

It is a matter of great pride for all Indians to hold the G20 Presidency this year. It is an excellent opportunity for India to regain its status as a *Vishwa Guru, a teacher for all times*. Symbiosis, which was established 51 years ago with the motto of '*Vasudhaiva Kutumbakam*', *the world is one family*, has dedicated itself to this spirit through its commitment to the nurturing of culture, respect for diversity and quality education.

We are pleased to inform you that Symbiosis International University will host a **Youth 20 (Y20) event under the G20 Presidency of India** and supported by the **Ministry of Youth Affairs and Sports, Government of India** on the **11th March 2023** at our **SIU Campus Lavale, Pune**. Y20 is an official consultation forum for youth from all G20 member countries to be able to raise awareness of global issues, exchange ideas, argue, negotiate, and reach consensus. The theme for our Y20 Consultation is '**Peacebuilding and Reconciliation: Ushering in an Era of No War- the philosophy of Vasudhaiva Kutumbakam**'. The sub themes of the seminar are '**Vikas politics**' in India as an enabler in conflict resolution, Climate Action, Gender related conflict, Legal Reforms needed for Social Change, Education Reforms, and the Future of Work.

The audience shall comprise young delegates, invitees and students from India and other G20 countries between the ages of 18 and 35 years. Through these deliberations we hope to inspire young minds thus fostering international cooperation and understanding not only through the creation of new knowledge, development of 21st century skills, and research and innovation to solve the many challenges our planet and humanity faces, but also to shape a new paradigm of human-centric globalization.

We request you to **nominate 10 of your best students** to participate in the Y20 Consultation. Please do write back to us on symbiosisg20@siu.edu.in with a scan of the attached **Registration Form** and any queries latest by **25 February 2023**. Attending participants shall receive Certificates of Participation and shall be hosted for the day's event with lunch and tea. Students will also travel conveniently to our Lavale campus by our bus which will pick them up at a fixed time from our Senapati Bapat Road campus.

We look forward to your participation.

AWARENESS OF MENTAL HEALTH

2022-23

PSYCHOLOGICAL COUNSELING CENTER

GOAL: Improve access to good quality mental health and social services and to promote the human rights of people with mental health conditions, psychosocial, intellectual or cognitive disabilities. In Academic year 2022 & 23 BY PSYCHOLOGICAL COUNSELING CENTER GARWARE COLLEGE OF COMMERCE [Autonomous]

Introduction

One in six people are in the age group of 10-19 years. Adolescence is a unique and formative period. Physical, emotional and social changes, a critical period for developing good habits,

Protecting adolescent children from adversity, promoting social-emotional learning and psychological well-being, and ensuring access to mental health care are critical to their health and well-being throughout adolescence and adulthood.

Globally, it is estimated that 1 in 7 (14%) 12-20 year olds experience a mental health condition (1), yet they remain largely unrecognized and undertreated.

Adolescents with mental health conditions are particularly vulnerable to social exclusion, discrimination, stigma (affecting willingness to seek help), academic difficulties, risk-taking behavior and physical illness, and human rights violations. Self-esteem begins to develop between the ages of 12 and 19, which includes poverty, abuse or violence. From the ages of 12 to 19, a critical period of self-esteem development, adolescents can be vulnerable to mental health problems.

- Globally, one in seven 12-20 year olds has a mental disorder, accounting for 13% of the global burden of disease in this age group.
- Depression, anxiety and behavioral disorders are leading causes of illness and disability in adolescents.
- Suicide is the fourth leading cause of death for ages 15-19.
- Failure to address mental health conditions in adolescence has consequences that extend into adulthood, impairing both physical and mental health and limiting opportunities to lead fulfilling lives as adults.

Many factors in daily life affect mental health. The more risk factors adolescents are exposed to, the greater the potential impact on their mental health. Factors that may contribute to adolescent stress include coping with adversity, peer pressure to conform, and identity search. Media influence and gender norms can increase the disparity between the reality of adolescent life and their perceptions or aspirations for the future. Other important determinants include the quality of their home life and relationships with peers. Violence (especially sexual violence and bullying), harsh parenting, and serious and socioeconomic problems are threats to mental health.

Some adolescents are at greater risk of mental health conditions because of their living conditions, stigma, discrimination or exclusion, or lack of access to quality supports and services. These include adolescents living in humanitarian and fragile settings; Adolescents with chronic illness, autism spectrum disorder, intellectual disability or other neurological condition; pregnant teens, teenage parents, or early or forced marriages; Orphans and adolescents from minority ethnic or sexual backgrounds or other discriminated groups.

EMOTIONAL DISORDERS

Emotional disorders are common in teenagers. Anxiety disorders (which may include panic or excessive worry) are most prevalent in this age group and are more common in older people than in young teens. It is estimated that 3.6% of 10-14 year olds and 4.6% of 15-19 year olds experience an anxiety disorder. Depression is estimated to affect 1.1% of 10-14 year olds and 2.8% of 15-19 year olds. Depression and anxiety share some common symptoms, including rapid and unexpected changes in mood.

Anxiety and depressive disorders can profoundly affect school attendance and school work. Social withdrawal can increase isolation and loneliness. Depression can lead to suicide.

BEHAVIORAL DISORDERS

Conduct disorders are more common in young adolescents. Attention deficit hyperactivity disorder (ADHD), characterized by difficulty paying attention, excessive activity, and acting out regardless of consequences, occurs in 3.1% of 10-14 year olds and 2.4% of 15-19 year olds (1). Conduct disorders (including symptoms of disruptive or challenging behavior) occur in 3.6% of 10-14 year olds and 2.4% of 15-19 year olds (1). Conduct disorders can affect adolescent learning, and conduct disorders can lead to criminal behavior.

EATING DISORDERS

Eating disorders, such as anorexia nervosa and bulimia nervosa, usually occur in adolescence and young adulthood. Eating disorders include abnormal eating behaviors and a preoccupation with food, in most cases preoccupation with body weight and size. Anorexia nervosa can lead to premature death, often from medical complications or suicide, and causes more deaths than any other mental disorder.

PSYCHOSIS

Psychosis Conditions involving psychotic symptoms usually occur in late adolescence or early adulthood. Symptoms may include hallucinations or delusions. These experiences can reduce an adolescent's ability to participate in everyday life and education, and often result in stigmatization or human rights violations.

SUICIDE AND SELF-HARM

Suicide is the fourth leading cause of death in older adolescents (15-19 years)(2). Risk factors for suicide are multifaceted, and include harmful use of alcohol, childhood abuse, help-seeking stigma, care, and barriers to accessing suicide resources. Digital media, like any other media, can play an important role in enhancing or undermining suicide prevention efforts.

RISK-TAKING BEHAVIOR

Many health-risk behaviors, such as substance use or sexual risk-taking, begin in adolescence. Risk-taking behavior can be an unhelpful coping strategy for emotional distress and can seriously affect an adolescent's mental and physical health.

Worldwide, the prevalence of heavy episodic drinking among adolescents aged 15–19 years was 13.6% in 2016, with males at highest risk(3).

Tobacco and marijuana use are additional concerns. Many adult smokers had their first cigarette before the age of 18. Cannabis is the most commonly used drug with around 4.7% of young people aged 15-16 using it at least once in 2018 (4).

Perpetration of violence is a risk-taking behavior that increases the likelihood of lower educational attainment, injury, involvement in crime, or death. Interpersonal violence was ranked among the leading causes of death among older adolescents in 2019.

According to mental health problems, in academic year 2022 & 23. Awareness program for Mental Health were organized by counselor. For students and Staff. Example Class room Activity, competition, workshop, expertly lecture, ext.
